

FrontPage

This is a wiki for some of the CORD web 2.0. discussions

From <http://www.nancydixonblog.com/> (<http://www.nancydixonblog.com/>)

"Leading edge organizations are taking advantage of Web 2.0 social media, building more user controlled platforms such as Wiki's, blogs and [social networking](http://www.nancydixonblog.com/2009/07/aspace-facebooklike-is-making-a-difference-across-the-us-intelligence-community.html) (<http://www.nancydixonblog.com/2009/07/aspace-facebooklike-is-making-a-difference-across-the-us-intelligence-community.html>) (e.g. Facebook) that bring with them greater organizational transparency and give rise to more diverse perspectives in the organizational conversation. The use of crowd sourcing, cognitive diversity, and predictive markets draw on a wider base of thinking, both internally and externally, that increases organizational innovation."

Great self help web 2.0 from our Regions librarians <http://explore8things.blogspot.com/> (<http://explore8things.blogspot.com/>) to learn about twitter, rss feeds etc

Felix Ankel to cord
show details Aug 2

Question for the cybercommunity. How many of you are using web 2.0 and social media in your residencies? What best practices have you seen with blogs, facebook, wikis, twitter, podcasts that you are willing to share? We've dabbled in some of this (e.g.residency facebook fanpage, tweeting our critical case conference take home points in a haiku) but are looking for a coordinated vision and plan for this.

Adam Rosh to me
show details Aug 2

We've been using web 2.0 for 2 years
I created an education website for the residents: www.drhem.com
I am happy to talk to you more about this.
Adam

Adam Rosh, MD, MS
Assistant Professor of Emergency Medicine
Assistant Residency Director
Detroit Receiving Hospital/Wayne State University

Hi Felix,
I will be working with Rob Rogers and Linda Regan on a Web 2.0 section at the CORD Academic Assembly in San Diego 2011 (Best Practices Track). Are you also involved with this? If not, are you interested?

Also, do you mind forwarding to me the replies you receive from your email on the list serve.

Thanks,
Adam

PS - I attached the proposal that was submitted to Doug Char regarding our project.

Adam Rosh, MD, MS
Assistant Professor of Emergency Medicine
Assistant Residency Director
Detroit Receiving Hospital/Wayne State University

Page history

The Emergency Medicine Residency Strategic Planning meeting
Wednesday, April 21 – 8:00am – 1:30 pm

St. Croix Conference Room
HealthPartners Corporate Office Conference Center
8170 – 33rd Ave S
Bloomington, MN.

[Strategic Planning 2005-2010](#)

[Strategic Planning 2010-2015](#)

Message from Felix Ankel

Welcome to the EM Residency 2010-2015 Strategic Planning wiki. We have over 20 confirmed participants that include stakeholders within the residency, department, hospital, IIME, and community. The intent of the strategic plan is to develop a road map to guide the Regions EM Residency for the next five years. The intent of the wiki is to provide historical context, a repository of information and a venue for asynchronous pre and post planning meeting discussion. We have placed residency files on the wiki that you can access using the navigator to the right. Additionally, the following links provide more materials that may be of interest.

- <http://regionsemquality.pbworks.com/> - discusses some of our quality initiatives within the residency
- <http://aiamcquality.pbworks.com/> - describes some of the work our residency is doing with the department of psychiatry
- <http://emdashboards.pbworks.com/> - discusses some work on EM residency benchmarks and dashboards
- <http://regionsemchiefresidents.pbworks.com/> - describes the role of chief residents in our residency
- <http://regionseminternorientation.pbworks.com/> - last year's intern orientation information
- <http://regionseminterns.pbworks.com/> - intern survival guide

A schedule of the day will be posted soon. Questions to consider:

1. What are the characteristics of the ideal graduate in 2015?
2. What outcomes should we measure for our residency?
3. How do we benchmark these outcomes?
4. How do we build a dashboard for these outcomes?

Syncope Workup in Trauma Patients

Syncope accounts for 1-2% of all ED visits, and is a factor in some patients with blunt trauma, especially the elderly. If syncope is suspected, a "syncope workup" is frequently ordered. Just what this consists of is poorly defined. **Even less understood is how useful the syncope workup really is.**

Researchers at Yale retrospectively looked at their experience doing syncope workups in trauma patients. They were interested in seeing what was typically ordered, if it was clinically useful, and if it impacted length of stay.

A total of 14% of trauma patients had syncope as a possible contributor to their injury. The investigators found that the following tests were typically ordered in these patients:

- Carotid ultrasound (96%)
- 2D Echo (96%)
- Cardiac enzymes (81%)
- Cardiology consult (23%)
- Neurology consult (11%)
- EEG (7%)
- MRI (6%)

Most of this testing was normal. About 3% of cardiac enzymes were abnormal, as were 5% of carotid imaging and 4% of echocardiograms.

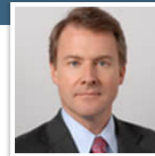

Important! Of the patients who underwent an intervention after workup, 69% could have been identified based on history, physical exam, or EKG and did not depend on any of the other diagnostic tests.

Conclusion: Syncope workup is not needed routinely in trauma patients with syncope as a contributing factor. Need for intervention can usually be determined by history, exam and EKG performed in the ED. In this study, **\$216,000 in excess costs would have been saved!**

Reference: Routine / protocol evaluation of trauma patients with suspected syncope is unnecessary. Davis, et al, Yale University. Presented at the 23rd Annual Scientific Assembly of the Eastern Association for the Surgery of Trauma, January 2010.
